Dear Judge,

I am responding to the news of the Proposed Final Judgement with Microsoft. As a student at a private university, I am very concerned about my government's recent actions, allowing for such a monopoly. I have no problem with Microsoft as a company, but i do recognize the need for competition in the marketplace. The Microsoft product is all too often in need of improvement and to eliminate any and all of its competitors will only cause the industry to progress slowly and loose some of its quality. As a consumer, I would appreciate being offered cutting edge, top quality software. I feel that my government is obligated to ensure a competitive, progressive industry. Please do what you can to preserve the ideals of the American marketplace.

Thank You, Alexa Frazee
